Summary

I am a passionate Full-stack developer with a solid understanding of both front-end and back-end development. I have worked with technologies like HTML, CSS, JavaScript, React, Node.js, and MongoDB. I enjoy creating websites and full-stack applications that are responsive and easy to use. I'm quick to learn new tools and technologies, good at solving problems and comfortable working in a team. I'm looking forward to working on real-world projects that make a difference.

Education

VIT BHOPAL UNIVERSITY

B.Tech in Computer Science, Health Informatics (CGPA - 9.19/10.00)

Bhopal, India

Sep 2023 – May 2027

Technical Skills

Programming Languages: Python, C++, HTML, CSS, Javascript, Flutter

Frameworks & Libraries: React.js, Node.js, Streamlit, Numpy, Pandas, TensorFlow, PyTorch, Keras, Langchain

Databases & Tools: REST APIs, SQLite, Git, GitHub, VS Code

Core Subjects: Operating System, Computer Networks, DataBase Management Systems

Projects

Podcast Streaming Service - (Link)

May 2025 – July 2025

MERN Full Stack Project

MongoDB, ReactJS, NodeJS, ExpressJS

- Developed a full-stack podcast streaming platform using the MERN stack, enabling users to browse, stream, and manage podcast content.
- Built secure user authentication and authorization using JWT, supporting user registration and login.
- Designed and integrated RESTful APIs for podcast management, user accounts, and content retrieval.
- Implemented CRUD operations for podcast upload, editing, and deletion with MongoDB as the backend database.

Smart RAG Assistant with Zylos AI - (Link)

Jun 2026 – July 2026

Generative AI Project

LangChain, Google Gemini 2.5 Flash, Sentence Transformers, FAISS

- Built an AI-powered Retrieval-Augmented Generation (RAG) chatbot using LangChain, FAISS, HuggingFace Embeddings, and Google Gemini 2.5 Flash.
- Implemented semantic search over uploaded PDFs and website content using vector embeddings for accurate context retrieval.
- Developed a responsive Streamlit application featuring document upload, website ingestion, conversational AI, and custom UI.
- Designed Zylos AI, an intelligent in-app assistant for onboarding, feature guidance, and troubleshooting using Gemini.

Early Detection of Skin Cancer

Jan 2025 – Apr 2025

Deep Learning Project

Python, CSS, TensorFlow, Keras, Scikit-learn, FastAPI, Streamlit

- Developed a deep learning-based skin cancer detection system using Convolutional Neural Networks (CNN) to classify dermoscopic skin lesion images.
- Evaluated model performance using accuracy, precision, recall, and confusion matrix to assess classification effectiveness.
- Integrated the trained model into an intuitive web interface for real-time skin lesion prediction from uploaded images.

Experience

Information Systems Intern - (Link)

Indian Oil Corporation Limited (IOCL)

May 2026 – June 2026

Barauni Refinery, India

- Assisted in developing internal software solutions for organizational workflows.
- Worked with databases, data processing, and application development.
- Collaborated with team members to improve operational efficiency through technology.
- Gained practical exposure to enterprise software development and software deployment.

Certifications

- Udemy Certified Machine Learning - (Link)
- Scalar Certified C++ - (Link)
- Ethnus Certified Mern Full Stack - (Link)
- Data Science with Python - (Link)
- Flutter - (Link)
